The Consulting team: the wise helpers

You are the helper who gives good advice. You help your friend's lemonade stand, and you guess what will happen to two other stands.

The big idea

There are 50 lemonade stands. Each one is cut into 100,000 slices called **shares**. Slices go up in value when a stand does well, and down when it does badly. You **can't buy or sell slices**. You earn money by **helping** and by **guessing right**.

Your friends (your squad)

At 21:00 the computer puts you in a team of three, called a **squad**:

- 🍋 one **Product** team (the lemonade stand you help),
- 🧑‍💻 you,
- 💰 one **Finance** team (the investors).

You also get **2 other stands to watch**, from other squads.

How the night goes

1. **Help with the story (21:10–22:30).** Your stand writes its pitch. Help them make it great.
2. **Guess #1 (by 23:15).** For each of your 2 stands, say **BUY** (it'll go up) or **SELL** (it'll go down).
3. **Oh no! (00:30).** Something bad happens to every stand. Now your stand really needs you.
4. **Your pay (by 01:05).** You and your stand agree what you get paid: $10,000 to $35,000, in money or slices. You **both** press confirm. If you don't, you automatically get $22,500.
5. **The rescue deal (by 02:45).** You choose the **price** for the deal: how much the investors pay per slice (between half and all of the after-crisis price). The investors choose **how much money**. All three press **Sign**. 🎁 **Signed by 02:45 = a $5,000 bonus for you.**
6. **The rescue plan (by 03:00).** Write it together with your stand: up to 500 words. **Late = 0 marks.** No signed deal = at most 50 marks.
7. **Guess #2 (03:30–03:40)** and **Guess #3 (04:20–04:30).** BUY or SELL again for your 2 stands.
8. **Surprise news (04:00).** Help your stand write a short answer (100 words).
9. **The end (05:00).** We count.

How you earn

What	How much
Your pay from the stand	$10,000 – $35,000
Rescue plan marks	$500 for every mark above 50 (and you **lose** $500 for every mark below 50)
Deal signed by 02:45	$5,000
Each right guess	$2,500 (6 guesses)

A guess is right only if the price really moved your way. If it stays exactly the same, it counts as wrong.

How you win

At 05:00: **your money + any slices you were paid × the final price.** Most money wins. 🏆

Tips

- The plan marks are your biggest prize: 90 marks = +$20,000!
- Get the deal signed early. Late deals hurt everyone.
- Being too greedy (a huge fee, or a super-cheap deal with a weak plan) makes the fairness officer look closely.
- The **purple bar** at the top always says what to do next. Tap it.
- Talk to your squad in **Chat** on the site. Agree the fee there, then do it on the Rescue page.
