Finance team card (F01–F50)

You are an investment fund with $500,000. Final value = **cash + long shares × closing price − short shares × closing price**, ranked by return on $500,000. Tie-break: smaller largest single position.

When	Do	Rule
21:00	Squad formed: you buy **5,000 seed shares** of your squad's company at $10.00 (−$50,000)	Squad lot: not tradable, not counted in your limits.
22:30–23:15	**Read the pitch book; ask questions** on the Q&A board	Answers ≤100 words, all public.
23:15–23:30	**IPO bids**: 0–4,000 shares per company	Not your squad's company. Total ≤ your cash at IPO prices. Oversubscribed: request × 35,000 ÷ total, rounded down to 10.
23:30–00:30	Rounds 1–4 (15 min)	
00:30	Crisis: trading halted, all prices −15%	
00:45–03:00	Rounds 5–12 (15 min; break 01:45–02:00)	
by 02:45	**Rescue deal**: you set the amount, $40,000–$80,000	Price set by the consultant (50–100% of post-crisis). All three sign; any edit clears all signatures.
03:30–05:00	Rounds 13–21 (10 min). Flash bulletin 04:00.	
05:00	Close: all shorts covered at the closing price	

Orders: BUY · SELL (shares you own) · SHORT · COVER. Edit or cancel until the round closes.

Clearing: net = (BUY + COVER) − (SELL + SHORT). Price moves **1% per 1,000 net shares, max ±10%**. **Every order fills at the new price.** E.g. $10.50, buys 2,000 + 1,500, sell 500 → +3% → all fill at $10.82.

Limits

Limit	Rule
Long	≤4,000 shares per company from the exchange (IPO included)
Short	≤2,000 shares per company; ≤$250,000 total short exposure
Buy reserve	qty × price × 1.10 held when you enter the order
Short collateral	150% of short value (× 1.10 on entry), recomputed every round; short of it = new buys/shorts blocked
Insider	never your own squad's company

Think about it this way

- The closing price is **half market, half AI price**. The AI price moves only with the judge's plan and flash scores. A company with a weak plan has a low anchor, however hard the market bids it up.
- Everyone buying the same stock in the same round pushes up everyone's fill price.
- Best-judging fund award: your portfolio valued at AI prices only.
- Three or more funds at the 4,000 cap in a company whose plan scores below 50 raises a collusion flag; so do two funds with near-identical orders.
