One case for every squad: setup guide

Market Simulation · for organisers · The Hostel Kitchen

Tonight **every squad plays the same case**. The lottery still forms the 50 squads (one Product, one Consulting and one Finance team each) and assigns coverage exactly as before; only the cards change.

Deck	Cards	What happens
Problem deck	**1** (The Hostel Kitchen)	At the draw every squad gets this card, **already chosen**. No pick, no pick deadline.
Crisis deck	**1** (Regulation: the food-safety rule)	At 00:30 **every company** gets the same crisis.
Flash bulletin	Cooking gas up 25%	Published at 04:00 to everyone, as usual.

A deck of 52 or more cards (squads + 2) still works the old way: 3 cards per squad, pick within 10 minutes.

1. Update the platform (once)

Run these on your laptop, in the project folder:

Step	Command / action
1. Get the new code	`git pull`
2. Update the database	`npx supabase db push` (adds the one-case change, migration 26)
3. Update the website	Render redeploys from GitHub on its own; wait until the deploy shows **Live**

If you use Codex for the matrix theme on the same branch, run `git pull` before starting it.

2. Upload the decks (before the lottery)

Log in as an organiser and open **Admin → Content**:

Panel	Upload this file
Problem deck	`seed/one-case/problem-cards.csv`
Crisis deck	`seed/one-case/crisis-cards.csv`
Flash bulletin	`seed/flash-bulletins/07-cooking-gas.csv`

Check the problem panel reads: **"1 card: every squad plays this same case (nothing to pick)."**

Both decks lock when the lottery is drawn. Upload them before you run the draw.

Setting up a fresh event instead? Seed it with the decks directly:

```
pnpm seed --slug live-2026 --date 2026-11-20 \
  --problems seed/one-case/problem-cards.csv --crises seed/one-case/crisis-cards.csv
```

3. On the night

Time	What you do	What teams see
Briefing	Hand **CASE-HOSTEL-KITCHEN.pdf** to every squad	–
21:00 Draw	Enter the seed and dice as usual	Squad formed; panel **"The case"** with an **Every squad** badge
21:10	Nothing to wait for: there is no pick	Product starts the PRD straight away
00:30 Crisis	Advance as usual	Every company gets **the food-safety rule**
04:00 Flash	Publish the prepared bulletin	Cooking gas +25%

Keep **CASE-HOSTEL-KITCHEN-facilitator.pdf** for organisers and judges only: it has the model answers and the scores to expect.

4. Quick checks

Check	Expected
Admin → Content, problem deck	1 card
Admin → Content, crisis deck	1 card, 1 category
Start gate (Setup)	No warning about the deck size
After the draw, Admin → Lottery	Every squad shows the same card, chosen
A team's Squad page	"The case" panel, no "Pick closes" line

If the upload is refused with "The deck needs exactly 1 card … or at least 52 cards", the file has 2–51 cards: use the one-card file. **If teams still see "Pick one of the three cards"**, the database update (step 1.2) or the website deploy (step 1.3) has not run yet.
